JOB OBJECTIVE

A competent and versatile IT professional with great learning-agility, targeting roles in **Project Management**, with a growth oriented organization preferably in **Hyderabad, Pune & Bangalore**

CORE COMPETENCIES

- Project Execution & Management
- Functional & Regression Testing
- Software Testing Lifecycle Management
- Defect Management/Bug Reporting
- Automation/ Manual Testing
- Code Deployment/ Upgrades
- Client/Stakeholder Engagement
- Requirement Gathering
- Scripts & Test Cases Development
- Troubleshooting

SOFT SKILLS

- Communication & Networking
- Analytical & Problem Solving
- Time Management & Multitasking

CERTIFICATIONS

- Certified as "AWS Certified Cloud Practitioner"
- Completed "SeleniumAutomation"
- Completed "Amazon Devops Engineer"
- Completed "Amazon EC2 Master Class (With Auto Scaling & Load Balancer)"
- Completed "Amazon EKS Starter: Docker on AWS EKS with Kubernetes"

PROFILE SUMMARY

- **A self-driven professional having nearly 8.2+ years of experience as Software Engineer, BA - PM, Application Engineer in IT & Non-IT Industry**
- Expertise in Business Analysis, Data Analysis, SFTP, HTTP Client, Soap Client, FTP, Database, producing User Stories and Business Requirements Documents
- Worked and Knowledge of basic automation testing and Test Case Design
- Skilled in entire requirements life cycle management from documenting, analyzing, prioritization and delivering the clean requirements to developers and QA team
- Performed data accuracy, data validation and data integrity testing by querying the database using SQL queries to check the data table on server
- Involved in requirements analysis, system/module design, coding, Project Plan, peer-reviews plans, test plans, test strategy, and documentation activities of software development life cycle
- Extensive experience of **NBFS** (Non-Banking Finance Services) domain; Updating Technical Documents and Procedures from Customers, BITS Team delivering the clean requirements to developers and QA team
- Comprehensive experience of various tools and technologies like (**SOAP, REST**) Web Services & API Management with different profiles **XML, JSON, DATABASE, FLATFILE**
- Experience in all phases of the **Software Development Lifecycle (SDLC)**, right from requirements gathering, risk analysis, project planning, scheduling, testing, defect tracking, management, and reporting. Experience in system testing, integration testing, functional testing, regression testing, E2E testing and **User Acceptance Testing (UAT)**
- Skilled in **mapping clients' business requirements and translating these requirements into functional specifications**, services, and custom solutions with successful project execution

TECHNICAL SKILLS

Applications	: IBM Web Sphere Data Stage 8.0.1/8.1, SAP-ABAP
Languages	: java, C, C++, REDHAT
Database	: Oracle, MS Access, MS SQL Server
Testing Tools	: Selenium, TestNG, Cucumber, Junit
Web Technologies	: JSON, RESTful API, XML, Java script, HTML5, CSS3
Servers	: Web Logic, Tomcat, IIS
Documents	: AutoCAD, Approach Document, Design Document, Data Management

WORK EXPERIENCE

Software Test Engineer | Wipro Technologies | Feb'22 - April'22

Software Test Engineer | Spoors Technology Solutions Pvt. Ltd. | Feb'18 - May'20
Lead (Business Associate -PM) | Al-Asdiqa Security & Safety Equip. fix | Sep'13 - Feb'18

Business Operations Trainee | Ayansys Software Solutions Pvt.Ltd. | Mar'12 - Mar'13

Roles and Responsibilities:

- Supervising the design, development, and execution of test solutions required for technological advancement

EDUCATION

B-Tech. in Electronics and Communications Engineering, from ACE, Jawaharlal Nehru Technological University, Hyderabad, India, 2010

PERSONAL DETAILS

Date of Birth: 10th April 1986

Languages Known: English, Hindi & Telugu

Address: House No. 3-100/2 Road No. 5 Hariharnagar, Karimnagar, Telangana

- Assisting all stakeholders engaged in system testing with extensive test planning, including requirements for engineering models, simulations, and testbeds
- Leading client/ user/ partner interaction for requirement gathering, risk assessment, finalization of technical specifications and discussions for effort/ cost/ time estimation and client coordination & reporting
- Conducting peer reviews and provide technical leadership to Test Engineers
- Extensive experience in working with the development team, business analysts, and clients to participate in analyses requirements
- Managing the software quality process involving review of product functions, test specifications & documentation, defect prevention, metrics collection & analysis, debugging & resolution of issues

- Providing overall leadership to the project team of 16 members including managing deliverables of own tasks in an effective manner which involves managing/ working on complex projects single-handedly and leading the other members towards project completion

PROJECTS UNDERTAKEN

PROJECT:

Client : Wipro Technology
Period : Feb'22 to April'22
Role : Software Test Engineer

Project Description:

The customer needed to optimize their pipeline, analyze deals, and streamline the transaction process for this project. To compare scenarios and support teams in the bidding process, a web application was connected with the application. We provided the global services and contact unit to effectively resolve issues and present investment opportunities to clients, in which we provided technical support to teams within the organization as well as external clients as needed, and presented investment opportunities to clients, partners, and investment committees.

Responsibilities:

- Collaborated with and supporting multiple World-wide development teams delivering a wide range of software applications
- Worked on tools like postman and SOAP UI to test the endpoints
- Possess knowledge on Database, Web services, HTTP Client, SFTP, Mail, and SOAP/REST based web services using XML/JSON payload interacting with external web services
- Authored optimized SQL queries and extract data from data warehouse as per business user requirement
- Designed, planned and executed software qualification during release testing cycle

PROJECT:

Client : Mahindra
Period : Feb'18 to May'20
Role : Software Test Engineer

Project Description:

The customer needed to optimize their pipeline, analyze deals, and streamline the transaction process for this project. To compare scenarios and support teams in the bidding process, a web application was connected with the application. We provided the global services and contact unit to effectively resolve issues and present investment opportunities to clients, in which we provided technical support to teams within the organization as well as external clients as needed, and presented investment opportunities to clients, partners, and investment committees.

Responsibilities:

- Designed, developed, implemented and supported fully automated Continuous Integration and Continuous Delivery processes
- Worked on Automating Web Applications using Selenium Web driver, TestNG, Maven & BDD(Cucumber).
- Worked in Automating the Web Applications using Selenium Web driver with TestNG.
- Experience in preparing Cucumber feature files(User Stories) and automated the feature file using Selenium.
- Performed feature testing, regression testing, sanity and smoke testing for feature releases, daily push and for hot fixes
- Studied and prepared updated test plans, understanding of the requirements

- Prepared the PDF, Excel, HTML templates for Report Publishing
- Created test cases. modified and updated test case for new features
- Managed and improved software release process while tracking and fixing bugs
- Setup the process to ensure project deliverables meet the timelines
- Executed Functional testing & Integration testing (Manual and Automated); identified regression test cases for automation
- Possess knowledge of tools like postman and SOAP UI to test the endpoints developed on boomi
- Worked of SAP, Database, Web services, HTTP Client, SFTP, Mail, and SOAP/REST based web services using XML/JSON payload interacting with external web services
- Worked on Rest Assured API, Postman, XML, JSON, SQL

PROJECT:

Client : Al Nadha, Al Marwan.
 Period : Sep'13 to Jan'18.
 Role : Lead (Business Associate – PM).

Project Description:

Al-Nadha is a leading consultant based in Sharjah , UAE and development of products to protect safety and improvement of the health well-being based in UAE, one among the largest client which we have provided support for various projects .We provide the global services and contact unit to handle the issues in a significant manner and more effectively present investment opportunities to clients, in which we provided support and providing technical support to teams within the organization, and to external clients when required and more effectively present investment opportunities to clients, partners & investment committees.

Responsibilities:

- Designed the Drawings and Representing / fixing the Fire Alarm & Fire Fighting Equipment's/Items in the Drawings as per NFPA Codes/Standard
- Analyzed the complete project particulars with help of engineering drawings
- Coordinated with the quality personnel for site/ material inspection and site engineer at the time of installation of both the system
- Completed new installation of fire alarm system for conventional and addressable system in various buildings
- Executed Annual Maintenance in fire alarm system and firefighting system in various
- Implemented B+G+ 3 fire Alarm & fighting sprinkler system installation works in SHARJAH and also various buildings in Sharjah.
- Completed G+P+6 fire Alarm & fighting sprinkler system in SHARJAH
- Attended meetings with consultant Engineers and owners discussed about work progress
- Rectified the site works as per drawing incorporated with consultant's comments
- Managed the material at the site as per site requirement and submit the drawings to consultant for approval
- Submitted catalogues and samples to consultant for getting approval by followed specifications
- Prepared the project shop drawings and BOQ of fire Alarm & fighting sprinkler system
- Applied to authority for final inspection in the project and ensured great team performance, safety and work organization

PROJECT:

Client : Ayansys Software Solutions Pvt. Ltd.
 Period : Mar'12 to Mar'13.
 Role : Business Operations Trainee.

Project Description:

Global Helpdesk is an internal project in which we provided support for various components and that will be used for training and demo purposes. We provide the global services and contact unit to handle the issues in a significant manner. It is part of the organization Application, in which we provided support and providing technical support to teams within the organization, and to external clients when required and more effectively present investment opportunities to clients, partners & investment committees.

Responsibilities:

- Worked closely with customers / partners and sub partners to deliver the best possible service by way of coordination and communication on all aspects of the requested service
- Coordinated with the Account Managers to address customer complaints and issues and produce service delivery, customer satisfaction through daily operations and process
- Produced and maintained service delivery improvement plans specifically tailored to the customers /partners needs
- Maintained and updated technical documents and procedures and identifying and resolving technical issues
- Delivered regular and customized training to teams within the business
- Authored optimized SQL queries and extracted data from data warehouse as per business user requirement
