Verizon. Is an American multinational telecommunications conglomerate, headquartered at New York Verizon is the world's largest telecommunications company. Verizon is one of the largest provider of mobile telephone services and the largest provider of fixed telephone services in the United States.

The project that we work is Conversions which is a part of Reverse IRB project. This project is started as an initiative for single billing for all wired, wireless, FIOS and various LEC's. The system is composed of only batch components for development. As a part of Conversions, we extract data from Master file, DB2, IMS DB and VSAM files based on input given i.e., BTN. We then upload data in DB2 and initiate billing batch to validate conversion data.

Responsibilities:

- Enhanced Batch Program's code.
- Prepared Unit Test Plan documents.
- Responsible for Unit testing the Code and prepared the Unit Test Results documents Coordinated with testing team.
- Involved in COBOL, JCL, VSAM and DB2 changes
- Involved in resolving the job abends as per the business requirements.
